Date November 11, 2009
Subject Mighty Servant 3 project

Dear Mr. Beswick,

I would like to take this opportunity to thank you and your team for your assistance in providing the Electrical Switchgear and indeed all the Electrical Equipment and associated engineering to enable the Mighty Servant 3 to be re-instated back into the Dockwise fleet.

The project proved to be very challenging and extremely complicated in the majority of disciplines. Your ability to upgrade the vessel from its original 25 year old design encompassing the features of up to date technology has proven to be extremely successful.

Dockwise recognize the following major disciplines engineered and supplied by R&B Switchgear:

- 6000v Main Switchboard.
- 440v Main, Cargo & Emergency Switchboards.
- Ships entire LV Distribution Switchboard Network.
- Ships Entire MCC Control Switchboards.
- 6000v Hyundai Generators, 6500kw - 2 off.
- Auxiliary Diesel Generators - 4 off.
- De-Ballast Compressors.
- Ballast Pump Motors.
- Refurbishment of Propulsion & Bow-Thruster Motors.
- Full Automation System Integration in conjunction with Bond Automation.
- 6000 / 440v Aux Transformers.
- 440/230 v services Transformers.
- 110v and 24v DC Battery Systems.
- Bridge Equipment & Navigation Switchboard and associated Eqt.
- Ballast / De Ballast Control Systems.
- Ships Lighting & Domestic Systems.
- Full Integration & Engineering of the Electrical Systems on board the vessel.

Mighty Servant 3 is now fully operational and continues to be a valuable asset to the Dockwise fleet.

Yours Sincerely,

Eugène van Dodeweerd
Manager Fleet Supervision
