Dear Mark

Re: Switchgear Change C&D Sub-Stations Hillhouse

We are writing to express our appreciation and convey our thanks for the extremely efficient and professional way in which your Company engineered this project to a successful completion.

We were particularly pleased with the way in which the work was progressed on Site. This resulted in the agreed plan being completed ahead of schedule and thus minimised the effect to Zeneca Resins plant production.

Please convey our thanks and appreciation to all concerned.

Yours sincerely

K P WARDLE
